TITLE Faculty Salaries in California's Community Colleges, 1993-94: A Report to the Legislature and the Governor in Response to Supplemental Report Language for the 1979 Budget Act.

INSTITUTION California Community Colleges, Sacramento. Office of the Chancellor.; California State Postsecondary Education Commission, Sacramento.

PUB DATE 14 Jul 94

NOTE 27p.; Prepared as Agenda Item 13, Attachment C at a meeting of the Board of Governors of the California Community Colleges (Sacramento, CA, July 14, 1994).

PUB TYPE Statistical Data (110) -- Reports - Research/Technical (143)

EDRS PRICE MF01/PC02 Plus Postage.

DESCRIPTORS *College Faculty; Community Colleges; Full Time Faculty; Part Time Faculty; *Salary Wage Differentials; State Surveys; *Teacher Salaries; Two Year Colleges; *Wages

IDENTIFIERS *California Community Colleges

ABSTRACT

In response to legislative directive, this report presents salary information for part- and full-time faculty in the California Community Colleges for the 1993-94 fiscal year. Part 1 presents an executive summary, indicating that the estimated average salary for full-time faculty in 1993-94 is $50,546, a 1.2% increase from 1992-1993; that the disparity between California's ten highest-paying and ten lowest-paying districts for 1992-93 stood at 26.0%; and that the previous disparity between full- and part-time faculty continues for 1993-94, with full-time faculty earning more than twice as much as part-time faculty on a contact hour basis, even after adjusting for the advising and counseling activities of full-time professors. Part 2 provides narrative descriptions and tabular displays of salary data, covering the following areas: (1) mean salaries for 1992-93; (2) the highest- and lowest-paying districts from fall 1987 to fall 1993; (3) annualized cost-of-living adjustments from fall 1990-91 to fall 1993-94; (4) two sample salary schedules for 1993-94; and (5) an analysis of mean dollars per weekly faculty contact hour (WFCH) paid to full-time, part-time, and overload faculty from fall 1989 to fall 1993. Appendixes include fall 1993 tables showing number of employees by type of assignment; number of full-time equivalent employees by type of assignment; percent distribution of annual salary and WFCH per schedule for credit, total contract, and regular faculty; and percent distribution by hourly compensation rate for contract, regular, and part-time faculty. 1 Executive Summary

THE CALIFORNIA Postsecondary Education Commission has produced an annual report on faculty salaries in the California Community Colleges since 1979, when the Legislature requested such reports in Supplemental Report Language to the 1979-80 State Budget. This latest report in the series presents nine displays containing data on mean salaries, the highest- and lowest-paying districts, the number of full- and part-time faculty, the number of contact hours taught, the cost-of-living adjustments granted by each district over the past four years, two examples of community college salary schedules in the current year, and a general summary of compensation for full-time, part-time, and overload faculty.

Cost-of-living adjustments

Information included in this report indicates that, while 1993-94 may be a better year for community college faculty compensation than was 1992-93, the fiscal restrictions that have been confronting all of California's public sectors for several years continue to affect community college faculty. Although information is incomplete, the estimated average salary for full-time faculty in the current year is $50,546 -- a 1.2 percent increase from 1992-93. This compares to an average increase over the six previous years of 4.7 percent. The unweighted average cost-of-living adjustment is very similar -- 1.27 percent for the 40 districts that reported for the current year at the time of this writing. The weighted average, which is influenced by the fact that several of the largest districts in the state granted increases of at least 2.0 percent, is at 1.57 percent. This weighted average figure, while higher than the 0.71 percent reported a year ago, is still substantially lower than those figures reported prior to the start of the State's current fiscal difficulties -- 6.7 percent in 1989-90 and the 5.4 percent in 1990-91. Given the severe fiscal restrictions anticipated for the 1994-95 budget year, it is unlikely that there will be significant improvement in faculty salaries in the coming year.

Differences between the highest-paying and lowest paying districts

The disparity between California's ten highest-paying and ten lowest-paying districts over the past eight years has averaged between 25 and 30 percent and for 1993-94 stands at 26.0 percent. The gap between the highest-paying district (Saddleback at $60,877) and the lowest-paying district (Palo Verde at $37,709) is considerably higher -- 61.4 percent -- and up from 53.0 percent in 1992-93.

Salaries of full-time and part-time faculty

In previous reports, the Commission has noted the considerable disparity between the compensation received by full-time faculty versus part-time faculty. While smaller for 1993-94, that disparity continues, even when adjustments are made

for other responsibilities such as advising and counseling that are part of the full-time faculty member's responsibilities. In the current year, full-time faculty are paid more than twice as much as part-time faculty -- exclusive of fringe benefits and adjustments for responsibilities such as advising and counseling -- on a contact-hour basis. A similar gap exists between the compensation received by full-time faculty for regular instruction versus overload instruction.

Weekly faculty contact hours

The percentage of weekly faculty contact hours (WFCH) taught by full-time faculty, part-time faculty, and full-time faculty on overload assignments fluctuated little between Fall 1991 and Fall 1993. Part-time faculty taught between 36.8 and 37.0 percent of contact hours over that time. This small fluctuation comes despite the pressures to increase less expensive part-time faculty that come with the budget pressures that California's community colleges currently are facing. These pressures may have been resisted due, in part, to AB 1725, which established the goal that 75 percent of all credit classes be taught by full-time faculty. While this goal has not been achieved, the community colleges have not been moving away from it despite fiscal pressures to do so.

2 Description of the Data

Development of the community college faculty salary reports

In February 1979, the Legislative Analyst recommended in his *Analysis of the Budget Bill, 1979-80*, that the Commission include information on California Community College faculty salaries in its annual faculty salary reports. Responding to this recommendation, the Commission presented data on community college faculty salaries for the 1977-78 fiscal year in its April 1979 report, *Faculty Salaries in California Public Higher Education, 1979-80* -- but it was unable to include data for 1978-79 because the Chancellor's Office had abandoned such data collection as part of the cutbacks resulting from the passage of Proposition 13 in June 1978.

Subsequently, Commission staff proposed that the submission of community college faculty salary data be formalized. In August 1979, it outlined for the Chancellor's Office staff the specific information desired and asked staff to submit 1978-79 data by November 1, 1979, and subsequent fiscal-year data by March 1 of the year involved. The Chancellor's Office agreed to do so, and since 1981-82 it has been able to do so, in large part because during that year it initiated the Staff Data File -- a computerized data collection system.

During these 11 years, the Chancellor's Office has submitted much information from the Staff Data File on average salaries and salary ranges; cost-of-living adjustments; teaching loads; numbers of full- and part-time faculty; age, sex, and ethnicity of its faculty; number of new hires, promotions, and separations; and qualifications and schedules for various salary categories. Some of the more detailed data arrays for 1993-94 regarding the number of faculty, teaching load ranges, and compensation appear in Appendix A of this report.

Unlike the Commission's reports that discuss faculty salaries at the California State University and the University of California, its reports on community college salaries are not designed to assist the Governor and the Legislature in determining cost-of-living salary adjustments for the coming fiscal year. While the Commission's report for the two university systems presents data collected from national groups of selected comparison universities, projects salaries at those institutions into the coming fiscal year, and determines California's anticipated parity deficiencies with those institutions, the Commission's reports on community college faculty salaries do not. Rather, they simply present an overview of compensation for both full-time and part-time faculty in California's community colleges that may provide substance for the policy discussions surrounding community college finance generally

Despite improvement in the reporting of data each year by the community colleges, two problems persist:

- The first relates to incomplete data, due primarily to protracted collective bargaining negotiations. When negotiations extend into the spring of the current academic year, and cost-of-living adjustments are accordingly allocated retroactively, there is seldom sufficient time to include the increases in the mean salary figures reported. The result is that many of the mean salaries reported are inaccurate. In addition, 30 of the system's 71 districts had not report cost-of-living adjustments for this year as of this writing.
- The second problem is that complete salary adjustments are not always reported. In 1993-94, for example, one-time "off-schedule" or "add-on" adjustments were reported for faculty in six districts.

Average salaries

Display 1 on the opposite page shows 1992-93 mean full-time contract and regular faculty salaries as reported by 69 of the 71 community college districts (Santa Clarita and Sequoia Community College Districts did not report this year). The second footnote in that display indicates that 30 districts report not having concluded negotiations on cost-of-living increases for 1993-94, and consequently could not incorporate such increases into their mean salary figures. As a result, the salaries reported for those districts more nearly approximate 1992-93 salaries, and it may be anticipated that the final mean salary for the system will be slightly higher than the $50,198 reported.

The 41 districts that reported current-year salary data (57.7 percent of all districts) represented 68.3 percent of the systemwide total number of faculty in the community college system. Although several large districts (e.g. Contra Costa Coast, Foothill-De Anza, Ventura) have not yet completed contract negotiations, it is unlikely that the systemwide weighted mean will rise much higher, given that 11 of the 15 largest districts have completed negotiations as well as the continuing austerity of public finance generally.

High-paying and low-paying districts

Displays 2 and 3 on pages 6 and 7 show mean salaries as reported in the Staff Data File for regular and contract faculty in the ten highest- and ten lowest-paying districts between Fall 1987 and Fall 1993, and the systemwide means for each of those years. In each case, those districts reporting incomplete mean salary data are indicated. Display 4 on page 8 shows mean salaries for the highest and lowest paying districts, the percentage difference between them, and their total number of faculty.

In 1992-93, the highest-paying district was Saddleback, with a mean of $60,877. For the fourth straight year, the lowest-paying was Palo Verde, with a mean of $37,709 -- although it should be noted that Palo Verde contract and regular faculty number only 19, and that the college is located in a relatively impoverished

Statewide Mean Salary[2]	$40,046	$42,035	$44,286	$47,575	$49,074	$49,891	$50,198

1. Districts where 1993-94 salary negotiations are still in progress.
2. Weighted by total faculty in each district.
3. Includes both credit and non-credit instructional faculty.
4. Includes only credit instructional faculty.

Source: Derived from the Staff Data File, Chancellor's Office, California Community Colleges.

area. The average salary paid at Saddleback -- the State's highest paying district -- was 61.4 percent higher than the average salary at Palo Verde -- the State's lowest paying district. The gap between the highest and lowest paying districts was only 37.4 percent five years ago (Fall 1988).

From Display 4 on page 8, it can be seen that the higher-paying districts have tended to be the larger districts. Beginning in 1992-93, however, with many larger districts granting no increases, the size disparity has narrowed considerably.

1. Districts where 1993-94 salary negotiations are still in process.
2. Imperial did not report data for 1992-93.
3. Weighted by total faculty in each district.
4. Includes both credit and non-credit instructional faculty.
5. Includes only credit instructional faculty.

Source: Derived from the Staff Data File, Chancellor's Office, California Community Colleges.

Until 1992-93, salaries paid to non-credit faculty (working principally in the evening programs) employed by the San Diego and San Francisco adult centers were excluded from the mean salary calculations. Since they tend to be paid about one-fourth less than regular faculty at the main campus, their inclusion consequently tends to reduce districtwide salary averages, as well as statewide mean salaries, although the latter are affected only slightly.

Taken as groups of the ten highest and ten lowest, the difference for 1993-94 is 26.0 percent -- a number that is generally consistent with that reported in recent years.

DISPLAY 4 Analysis of the Mean Salaries Paid by the Highest- and Lowest-Paying Community College Districts, Fall 1987 to Fall 1993

Item	Fall 1987	Fall 1988	Fall 1989	Fall 1990	Fall 1991	Fall 1992	Fall 1993

Cost-of-living adjustments

Display 5 on page 9 provides cost-of-living-adjustment (COLA) information, by district, for the current and previous three years, weighted by the size of faculty in each district. Based on these weighted figures, the systemwide cost-of-living increases averaged, 5.33 percent in 1990-91, 1.54 percent in 1991-92, 0.71 percent in 1992-93, and 1.57 percent in 1993-94. While the weighted average COLA increased substantially between 1992-93 and 1993-94, the increase in the unweighted average -- from 1.08 to 1.27 percent -- was far more moderate. This is explained by the generally larger faculty salary increases at the State's larger community college districts. While in the previous three years, generally smaller faculty salary increases at the larger districts brought the weighted average COLA below the unweighted average COLA; for 1993-94, that pattern changed. The larger districts granted larger faculty salary increases, resulting in a weighted average COLA that is 23.6 percent higher than the unweighted average COLA. The three largest and six of the ten largest community college districts in California granted COLAs for 1993-94 of at least 2 percent. This includes an increase of 3.0 percent for the Los Angeles Community College District -- the State's largest district -- which employs over 10 percent of the State's community college faculty.

DISPLAY 5 Annualized Cost-of-Living Adjustments Granted to Regular and Contract California Community College Faculty, by District, Fall 1990-91 to Fall 1993-94

2. Data were unavailable, unreported, or no response was received to follow-up efforts.
3. Salaries weighted by the Fall staffing pattern of applicable fiscal year.

Source: Derived from the Staff Data File, Chancellor's Office, California Community Colleges.

The discrepancy between the 1993-94 and 1992-93 figures will likely decline as more complete information is obtained on 1993-94 faculty salary increases and the mean district COLA figures are updated. As a result of the updates, the system-wide average cost-of-living increase typically falls. For 1992-93, the update moved the average cost-of-living increase from .89 percent with incomplete information to .71 percent with more complete information.

One of the reasons this occurs is that districts engaged in protracted salary negotiations are often those with the least financial resources. Accordingly, the final settlements are often below statewide averages. In 1993-94, it can be expected that many of the 30 districts that have not yet reported will grant no salary increases at all. Consequently, the 1.57 percent average increase for faculty calculated based on the 41 districts that did report will be lowered when all districts have reported. If all of the non-reporting districts granted no increase, the statewide weighted average would be 1.06 percent.

Display 6 on page 11 provides a graphic demonstration of how salary increases in the community colleges are receding. It can be seen that most increases in 1990-91 were in the 4.1 to 8.0 percent range. In 1991-92, that percentage fell to where most increases, if any were granted, were at 4.0 percent or below. In both 1992-93 and 1993-94, the modal increase has been zero, with most districts granting 2.0 percent or less. When the currently unreported districts do report, it is expected that most will fall into the first two categories of 2.0 percent or less.

Salary schedule categories

The salary schedules of the 71 districts generally provide a number of salary categories or classes through which faculty members can advance depending on educational qualifications, and another series of steps that provide salary increases based on longevity. Sample schedules are reproduced as Displays 7 and 8 on pages 11 and 12 -- those of the Rio Hondo and Contra Costa Community College Districts.

As with mean salaries, these schedules vary greatly from district to district, with some districts offering only one salary classification based on educational achievement, while others offer as many as nine. In addition, some districts have as few as 12 anniversary increments, while others have 30 or more. In some cases, additional stipends are provided to doctoral degree holders, department chairpersons, and others with special qualifications or responsibilities.

Part-time faculty and full-time faculty with overload assignments

For many years, the community colleges have employed a large number of part-time or temporary faculty, and most districts have also permitted full-time regular and contract faculty to work additional hours or overloads. Display 9 on page 13 shows several comparisons between full-time, part-time, and overload faculty between Fall 1989 and Fall 1993. For example, it shows the number of full-time faculty with and without overload assignments compared to the number of part-time faculty. It also shows workload in terms of weekly faculty contact hours

(WFCH) -- the actual number of hours faculty spend in classrooms. Comparing these two, it can be seen that, while the number of part-time faculty outnumber full-time faculty by almost two-to-one, they taught only 36.8 percent of these contact hours in Fall 1993. Regular and contract faculty taught 56.0 percent on regular assignments, with those teaching overloads accounting for the remaining 7.2 percent. Regular and contract faculty on regular assignments averaged 15.9 weekly faculty contact hours in Fall 1993, a number that has remained relatively constant for the past several years. Part-time faculty averaged 5.7 hours, and those teaching any overload averaged 4.8 additional hours. Some 42.4 percent of full-time regular and contract faculty members teach some overload. Since 1989, the number of contact hours taught per full-time faculty member on regular assignments

DISPLAY 9 Analysis of the Mean Dollars per Weekly Faculty Contact Hour (WFCH) Paid to Full-Time Faculty, Part-Time Faculty, and Full-Time Faculty Teaching Overload Assignments in the California Community Colleges, Fall 1989 to Fall 1993

Item	Fall 1989	Fall 1990	Fall 1991	Fall 1992	Fall 1993[1]
1. Number of Faculty Members					
Full-Time Faculty[2]	8,445	8,207	8,986	8,891	8,466

5. Mean Dollars Paid per WFCH					
Part-Time Faculty	$29.68	$31.79	$33.09	$34.33	34.64
Overload Faculty	$35.04	$37.06	$38.12	$39.33	39.62
6. Percent that Overload Faculty Compensation Exceeds Part-Time Faculty Compensation	18.1%	16.5%	15.2%	14.6%	14.4%
7. Mean Dollars Paid to Contract and Regular Faculty per WFCH, Assuming No Overload Assignments[4]					
Unadjusted	$75.42	$81.15	$89.30	$87.54	$82.39
Adjusted[5]	$56.57	$60.86	$66.98	$65.66	$61.79
8. Percent that Compensation of Full-Time Faculty as Adjusted in Item 7 Exceeds Part-Time and Overload Faculty Compensation per WFCH					
Part-Time Faculty	90.6%	91.5%	102.4%	91.3%	78.4%
Overload Faculty	61.4%	64.2%	75.7%	66.9%	56.0%

1. Figures are statewide estimates from the Community Colleges Chancellor's Office.
2. No overload. All contract and regular faculty.
3. Full-time faculty teaching regular assignments only.
4. Based on a 35-week year.
5. Dollar amount reduced by 25 percent to reflect additional responsibilities of regular and contract faculty such as counseling, advising, committee work, office hours, and community service.

Source: Derived from the Staff Data File, Chancellor's Office, California Community Colleges.

has declined slightly, while those of both part-timers and faculty teaching overloads are very close to what they were in 1989.

Compensation comparisons between full-time and part-time faculty are difficult to make, since part-time faculty generally do not have responsibilities other than classroom teaching and preparation for teaching, while full-time faculty are expected to spend time in counseling, advising, committee work, office hours, and community service. The exact proportion of total workload devoted to activities not directly related to classroom teaching and preparation is not known, but an assumption used by the Chancellor's Office (1987, p. 7) is that three-fourths is instructionally related, while the remaining one-fourth is devoted to other campus activities. Although this estimate is not a precise measure, by using it as an adjustment in Item 7 of Display 9, it is possible to make the several general comparisons shown in Item 8 of that display: On a systemwide basis, full-time faculty in Fall 1993 earned substantially more in salary (78.4 percent more) per weekly faculty contact hour as did part-time faculty, and 56.0 percent more than the amount full-time faculty received for overload assignments. If fringe benefits were added into these calculations, these percentages would be even higher.

Based on hourly rates paid part-time faculty and those full-time faculty with overload assignments, Item 6 in Display 9 indicates that overload faculty are currently paid 14.4 percent more for their overload assignments than part-time faculty.

Implications of the data

Over the past five years, the workload and compensation differences among regular faculty, part-time faculty, and overload faculty have changed very little. Given the continuing fiscal crisis facing California higher education, one might expect to see changes in these areas. However, perhaps more indicative of the continuing fiscal crisis in California higher education is the amount of the cost-of-living adjustments granted to contract and regular faculty. Until the current year, the average cost-of-living adjustment for community college faculty had been declining steadily since 1989-90. The weighted mean adjustment declined from 6.69 percent in that year to 0.71 percent in 1992-93, and while only two districts gave no cost-of-living adjustment in 1989-90, over 30 did so in 1992-93. Fiscal pressures have undoubtedly had an impact upon the cost-of-living adjustments granted to community college faculty. For 1993-94, however, the weighted mean cost-of-living adjustment began to climb once again. While it by no means has climbed back to the levels it was at prior to the start of California's economic difficulties, it is over twice what it was for 1992-93. One must be careful, however, about interpreting this as a sign of improved economic health. As cost-of-living adjustments are put off or delayed, as they were in both 1992-93 and 1991-92, the pressure for cost-of-living adjustments in subsequent years only increases. Thus, the increases for 1993-94 may be as much a reflection of accumulated pressures for cost-of-living adjustments as a reflection of lessening economic pressures being faced by California's community colleges.

In a previous report, the Commission noted that the community colleges expected to hire some 20,000 new faculty over the next 15 years -- a task that was assumed to be very difficult given the current budgetary austerity. No systematic studies have been conducted of community college faculty recruitment, yet all anecdotal evidence suggests that community college districts are not having difficulty filling vacancies. Most vacancies for full-time teaching positions are pursued by hundreds of applicants, many of them drawn from among the large pool of part-time teachers who often commute between campuses -- the "freeway flyers," as they are often called.

In times of fiscal crisis, one might expect the number of contact hours taught by part-time and overload faculty to increase. However, since Fall 1990, the proportion of contact hours taught by full-time and overload faculty has increased, while the proportion and number of contact hours taught by part-time faculty has decreased. This may be explained, in part, by the provisions of AB 1725 (Chapter 973, Statutes of 1988). AB 1725 established a goal -- not to be confused with a mandate -- that the share of contact hours taught by full-time faculty should be 75 percent (currently 63.2 percent). Despite the current fiscal environment's incentives to hold the line on full-time salaries and to hire as many part-time faculty as possible, the community colleges are continuing to pursue the AB 1725's 75 percent goal. The proportion of contact hours taught by full-time faculty has been virtually unchanged over the last three years.

Some districts may attempt to reduce their full-time faculty cadres by offering early retirement programs -- this could be effective given that about 27 percent of the full-time community college faculty (about 4,400 instructors) are currently 55 years of age or older. Retiring full-time faculty could be replaced with part-time faculty at a considerable savings per contact hour taught. That, however, would increase the percentage of contact hours taught by part-time faculty, thereby running the risk of legislative displeasure because of the provisions of AB 1725. Alternatively, districts could achieve a smaller level of savings by hiring less senior full-time faculty who would presumably earn less than the retiring faculty.

The problems faced by community colleges related to faculty salaries are but a part of the larger budgetary problem faced by the community colleges and the rest of public higher education in California. Given the State's structural budget problems, it appears that these problems will outlast the State's current economic slowdown. Since these fiscal pressures will likely continue, California's community colleges face few good options in the near future regarding faculty employment and compensation.
